

Kern County Science Fair Is Coming Up!

By Jenifer Rangel
7th Grade Reporter

Hey, guess what! The Kern County Science Fair is coming up soon! You probably didn't know that, or that it was even a thing! You're probably wondering, what's the big deal about it? It's just an event-- but not just any event! Scholars from Grimmway Academy Arvin are going there on March 17th to represent us, as a school. This is a very exciting event for our scholars!

What is the Kern County Science Fair?

The Kern County Science Fair is an annual event where students from grades 4-12 participate for a chance to move on to the State Science Fair, which is also known as the California Science Fair. Students are interviewed by judges on their understanding of the project, hypothesis, lab notebooks, the amount of effort, motivation, and more! This event has been going on for years!

How Did Our Finalists Receive The Opportunity To Get To Go To The Kern County Science Fair?

First things first, every scholar was required to do a Science Project, and present it to the class. After everybody presented, Grimmway Academy Arvin's Science teachers picked 10 scholars from each grade to participate in the Grimmway Academy Arvin Science Fair, and present to judges. This happened in December 2019. Judges from the GAA Fair picked 2 lucky scholars from each grade level to move on to the Kern County Science Fair! Congratulations to our finalists from grades 4-8 who are moving on to the Kern County Science Fair!
